FIG. 9 is a schematic diagram of a system 900 for detecting a target 910. The system 900 includes a sensor 920, a processor 930, and a display 940. The sensor 920 is configured to detect the target 910 and generate a signal 950. The processor 930 is configured to process the signal 950 and generate a result 960. The display 940 is configured to display the result 960.

FIG. 3C is a cross-sectional view of the device 300, showing the device 300 in a cross-sectional view. The device 300 is a circular device, and the cross-sectional view shows the internal structure of the device 300. The device 300 is a circular device, and the cross-sectional view shows the internal structure of the device 300. The device 300 is a circular device, and the cross-sectional view shows the internal structure of the device 300.
